

## **HAO/NCAR HMI Monthly Progress Report, May 2006**

Work continues on the analysis and interpretation of the sun test polarization calibration data. Currently, data from 060306 is being analyzed and compared to earlier data.

Greg Card is working with engineers at Lockheed to diagnose and fix the problems with the PCU.

Preparation has started for the calibration review on June 23. Elmore, Lites and Tomczyk will attend in person and Norton and Borrero will call in.

Steven Tomczyk, June 14, 2006
