

Thomas L. Duvall Jr.'s quarterly report for SDO-related work for May 2006 to July 2006.

Duvall worked on SDO-related activities for 0.6 of workdays during May 2006 to July 2006. Work on the new kernel measurement has continued and a paper was published in the Astrophysical Journal. Duvall has attended regular Wednesday afternoon calibration meetings for the HMI instrument and has been analyzing some of the test data taken. A presentation was made at a recent calibration review.
